December 6, 2005 - RELEASE OF SECURITY INTEREST, WALKER DIGITAL, LLC FIVE HIGH RIDGE PARK STAMFORD CONNECTICUT 06905, Reel and Frame Number: 018668/0615

CORE TERMS: coupon, customer, terminal, rounded, purchase price, identifier, rounding, round-up, redemption, bar code ...

ENGLISH-ABST:

A POS terminal generates a purchase price of a purchase, and generates a rounded price. The rounded price may be, for example, the lowest whole number greater than the purchase price. The POS terminal then calculates a round-up amount (change due the customer) as the difference between the purchase price and the rounded price. The coupon value is set based on the round-up amount. For example, the coupon may be redeemable for triple the amount of change due. The POS terminal prints on the coupon an identifier, such as a bar code, that is based on the coupon value. The bar code allows the coupon to be read by a POS terminal when the coupon is redeemed.
